'Addressing Art Quilts'

Friday 8 September 2017

Ruth de Vos workshop

'I HAVE A THING WITH PLANTS'

'A Botanical Basis for Art Quilts'

Do you need a fresh boost to your art practice, or are you perhaps just looking to refine your existing focus? Or maybe you just love any opportunity to get your creative juices flowing?

Let's work through a design process that will have you looking at your artwork (and your neighbourhood flora) with fresh eyes. We will consider the shapes, tones and textures found in plants to inspire several of our own quilt designs. We will work through a bunch of exercises to develop several potential designs using pencil, collage and paint. Use the designs to inform your current work or to launch a whole new body of work. Either way, we're going to get your ideas and creative juices flowing!

Class Requirements:

- Scissors for paper (and fabric-optional),
- Glue Stick,
- Scraps of fabric and paper in a range of colours and tonal values,
- Needles and a few colours of thread (optional –for students who wish to work with scraps of fabric as well as paper.)
